

World Action Planner: Generalizable Robot Decision-Making with Action-Conditioned World Model and Agent

1 **MOVE**(x, y, z)
2 **ROTATE**(θ)
3 **RELEASE**

Reason about Task Instruction
and Propose Primitive Actions

Imagine with Action-Conditioned World Model

Optimization: Lift gripper to avoid collision with the rim.
Search: Candidate 2 shows better alignment compared with candidate 1, choose 2.

Optimize and Search Actions using Imagination

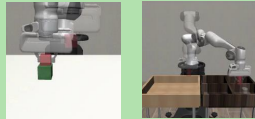

Successful
Execution

Compositional Task Generalization

New Layout Generalization

Novel task Generalization
