

Task instruction: Place the *white mug on the left plate* and the *yellow-and-white mug on the right plate*

Robot stalls and fails to complete the second sub-task

Agent action proposal

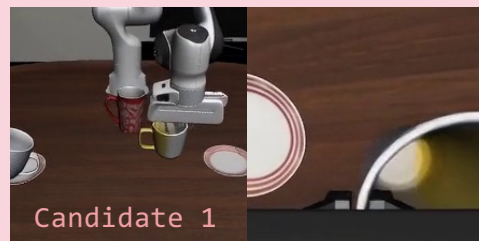

```
[{"action": "RELEASE"},
{
  "action": "MOVE",
  "parameters": {
    "frontview": {"x": 668, "y": 555},
    "topview": {"x": 587, "y": 490},
    "sideview": {"x": 575, "y": 585}
  }
},
{"action": "GRASP"}]
```

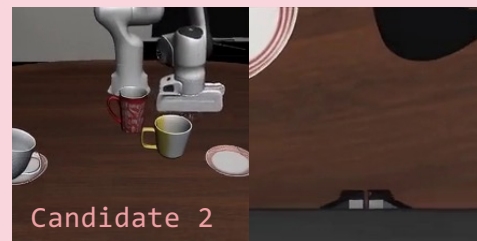

Imagine action proposal with action-conditioned world model

Candidate 0

Candidate 1

Candidate 2

Local search: imagine action candidates and policy rollout using world model, wrist and front view

Agent trajectory feedback:

Analysis: There is a potential risk of collision with the mug's rim when aligning the robot gripper.
Modification: {Delta_z: 1}

Agent candidate ranking:

Analysis:

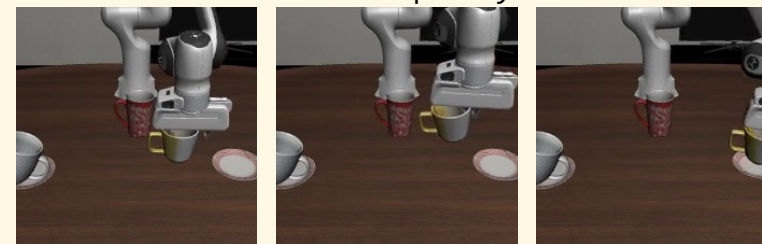

- Image 1: This shows the best grasp, with the rim between the gripper jaws.
- Image 0: The gripper is positioned too low, near the body of the mug.
- Image 3: The mug is far away from the gripper, representing the worst state for a grasp.

Ranking: [1,0,2]
