

Identify target object with VLM agent and propose primitive actions

```
[
  {
    "action": "MOVE",
    "parameters": {
      "frontview": {"x": 254, "y": 593},
      "topview": {"x": 285, "y": 656},
      "sideview": {"x": 339, "y": 589}
    }
  },
  {"action": "GRASP"}
]
```

Agent trajectory feedback:

Analysis: The milk box risks colliding with the basket rim; adjusting upwards for safety.

Modification: {Delta_z: 1}
